Patient's signature (mandatory):

Date :

Quality guarantees

SYNLAB-Barla laboratory is accredited COFRAC number 8-2538, sites and detailed list available on www.cofrac.fr.

The laboratory provides an instruction sheet and sampling and transport equipment. These elements are contained in the immunoBox.

Blood samples are transported in accordance with regulatory transportation standards and as required french laboratory good practice, namely:

- use of category B biological transport equipment, UN 3373;
- transport by DHL Medical Express meeting the requirements of “good distribution practices” of the french Code Public Health;
- upon receipt, the conformity of the samples is checked by the laboratory, with acceptance or refusal;
- carrying out analyzes on the day they are received, according to the procedures referenced in the quality management system.
